

# ROLL CAGE™ WELDING RIGGING GLOVES

K3109-M, K3109-L, K3109-XL,  
K3109-2XL

**Dual purpose gloves that offer complete protection for your hands.**

If you handle both welding AND rigging on your marine or construction job site, now you can work with ONE pair of gloves instead of two. Our Roll Cage Welding Rigging Gloves are constructed of durable cowhide, sewn with Kevlar® thread and enhanced with extreme knuckle protection to withstand tough environments.

## Applications:

Welding, Rigging, Cutting, Grinding

Sizes: Medium, Large, X-Large, 2X-Large

## Features

- ▶ **Silicone Knuckle Protection:** helps protect your fingers and back of the hand from impact and injury.
- ▶ **Palm Padding:** overlaying lining layer reinforces high wear areas of the palm.
- ▶ **Inside Lining Protection:** provides protection against cuts.
- ▶ **Kevlar® Stitching:** provides maximum strength.
- ▶ **Heat-Resistant Wrist Guard and Fastener:** secures the gloves while allowing for quick removal.

## Quick Reference

1. The longer length cuff protects the wrist and forearm areas from heat and sparks.
2. Heat-resistant fastener and extended gauntlet help to taper the cuff and keep spatter out.
3. Palm padding reinforces high wear areas of the palm.
4. Finger structure enhances grip and durability.
5. Constructed of top grade fire resistant cow leather.
6. Kevlar® stitching.
7. Silicone knuckle helps protect fingers and back of the hand from impact and injury.
